About the Cheat Sheet

These ranges were determined using a \$200 salary cap in a 12-team .5 PPR league, but can be adjusted by converting the ranges into percentages. For example, a range of \$50-54 in a \$200 cap would be \$25-27 in a \$100 cap. Also, since we don't believe in spending more than \$1 on defenses or kickers, no ranges were determined for those positions. The only reason you should be spending more than a \$1 on those positions is if it's your last roster spot and you have a little extra money left over.

Glossary

RK

Player's Rank

POSITION/PLAYER NAME

Player's name for given position

TM

Player's current team

BYE

Players bye week

TG ★

Player we are targeting in drafts at their ADP

LW 🔥

Players who have the upside to carry you to a top finish

TIER

A grouping of similar players at a particular position. For instance, you might view all Tier 3 WRs as WR2s in your league, depending on size.

VALUE

Preferred dollar range to spend on a player, with the caveat that auctions are fluid, and bidding wars may emerge based on remaining budget, roster need, and/or position scarcity. WW means the player should not be drafted and should be relegated to the Waiver Wire
